Property in Charge of the Superintendent of Streets.

Albany-street Paving Wharf, containing 54,450 square feet, inclusive of area covered by building. The building contains a blacksmith shop, carpenter's shop, tool-rooms, and shed for breaking stone and storage of material.

Charles-street Paving Wharf, corner Charles and Cambridge streets, containing 34,214 square feet. Upon this wharf are two buildings, one divided into blacksmith's shop, carpenter's shop, tool-room, office, and tenement upstairs for wharfinger; the other, a stable and shed.

Fort-Hill Wharf, placed in charge of the Paving Department, May 18, 1874, to be used for the landing and storage of paving-blocks and gravel, until such time as said wharf shall be wanted for the extension of Oliver street.

Lot on Chelsea, Marion, and Paris streets, East Boston, containing 43,550 square feet.

A Water Lot, on Conder street, 70 feet on said street, running to Commissioners' line, about 800 feet.

Ledge Lot, on Washington street, corner of Codman avenue, containing 134,671 square feet. Upon this lot are sheds and an engine-house.

Highland-street Stable Lot. Upon this lot is a large brick stable, erected in 1873–74, and occupied by the Health and Paving Departments. Also, a brick building, used as a blacksmith's shop, and a shed for the storage of tools, etc.

Ledge Lot, on Myrtle street and Bird place, containing 81,068 square feet. Upon this lot are a blacksmith's shop and large shed. This lot was purchased by the town of Dorchester, of Stephen Baker, in 1867.

Ledge Lot, on Codman street, containing 299,000 square feet, purchased by the Paving Department, of Hutchinson Brothers, in 1870. Upon this lot is a large shed containing a steam-engine and stone-crusher. Also, a stable and tool-house.

Upon the almshouse lot on Hancock street, Dorchester, there are one large stable, one small stable, two sheds, and a tool-house, occupied by the Paving Department.

Downer avenue Lot, containing 35,300 square feet, purchased by the Paving Department, in 1871, of Nathan and Henry N. Sawyer, for the protection of the almshouse lot.

Gravel Lot, corner of Forest Hills avenue and Norfolk street, containing 47,798 square feet, purchased by the town of Dorchester, of Benjamin Clapp, in 1860.

Gravel Lot, in town of Milton, on Brush Hill road, containing 64,523 square feet, purchased by town of Dorchester.

Lot on Child street, Ward 23, containing 14,457 square feet, set apart for the Paving Department, in 1875, upon which was erected a stable, with sheds, at a cost of $4,995.08.

Gravel Lot, on Morton street, Ward 23, containing about one-third of an acre, purchased by town of West Roxbury, of Michael Cook, in 1870.

Ledge and Gravel Lot, rear of Union street, Ward 25, containing about 37,000 square feet, purchased by town of Brighton.

Gravel and stones on lot on Market street, Ward 25, purchased by town of Brighton, of George Sparhawk.

On Rockland street. Ward 25, adjacent to engine-house, a brick building, shed, and tool-house.

Ledge Lot on Chestnut Hill avenue, Brighton, containing about 13 acres, upon which an engine-house has been erected.

On Medford street, Charlestown, a lot of land containing about 8,000 square feet, upon which are a stable, tool-house, sheds, etc.

In South Boston, corner of H and Ninth streets, a lot of land, containing about 12,000 square feet, upon which have been erected a stable, carriage-house, shed, tool-house, and office.

At the corner of Boylston and Hereford streets, a yard with shed, tool-house, and office.

Gravel Bank in Watertown, on land of John E. Cassidy.

Gravel Bank, Tenean street, Dorchester.

Tools, Horses, Carts, etc.

SNOW.

The care of the public ways, in charge of this department, has become more onerous from year to year. This is in consequence of the increased facilities for travel afforded by the extensions of the various horse-railroads, and the more frequent running of trains on the steam-roads, so that our streets are now daily crowded with people from the suburbs. They are, to a large extent, residents and tax-payers of Boston, and they demand that the streets shall be kept in good condition. Their demands, we trust, have been fairly met, so far as this department is concerned, except during the winter, and immediately following a fall of snow, when, in consequence of the ploughing of snow from the horse-car tracks, for the purpose of allowing cars to be run, to carry people to their places of business, they find upon their arrival the streets almost impassable.

This condition of affairs may last for several days, indeed for weeks, under the present method. Why? Let us see. Immediately upon the beginning of a fall of snow the horse-railroad companies begin running snow-ploughs, in order to keep their tracks open; and, in case of a fall of snow of six inches, the entire amount (or twelve inches) is thrown upon the sides of the roadway. The removal of this snow, from curb to curb, devolves, by law, upon the railroad companies. There are, then, within the limits of the old city proper many miles of streets in this condition; for it must be borne in mind that snow-ploughs can proceed at the rate of four or five miles per hour; while the removal of this snow, thrown upon the sides, is the labor of several days and nights. Most of our business-streets are now occupied by tracks, and their condition is liable to be as represented. Let us suppose six inches of snow already on the street in the form of hard, compact snow or ice. Now, let another fall of snow come — what follows? Eighteen inches of snow upon the sides! Another point: — The railroad companies use horses, smooth-shod — why? Because they could not employ blacksmiths enough to keep them sharp. They put salt and sand in large quantities upon the tracks, and this, in violation of the regulations of the Board of Aldermen. Why? Because they cannot otherwise keep their track in condition for smooth-shod horses. What is the result? The streets are

piled up with snow, salt and sand resembling dirty meal. Now follow this still further. Let a fall of warm rain come upon this — what then? The snow is immediately transformed into slosh, and the streets are ankle-deep. Then begins the trouble. Notices by telephone, by special messenger, from every quarter, are immediately sent to the office of the Street Department, that catch-basins are stopped, gutters not opened, and crossings not cleaned — trouble all around, and it must be remedied instantly!

Now, this is the critical time; and, if the snow between the curb and railroad tracks has been removed, it will be easy to open the gutters and let the water flow off through the catch-basins. But suppose the snow has not been removed? Then the gutters could not have been kept open with the snow piled up on the sides; neither can they be kept open while this slosh is filling them as fast as they are opened. Every effort is made by this department to open them. Suddenly a pond of water is seen at some prominent corner — what is the trouble? Catch-basin stopped! no water can run off. What is the cause? Whose business to remedy it? How long a time will be required to open it? To answer these questions. In the first place, the sewer may be full of water, and unable to take any more. Secondly, the basin may be stopped up by accumulations of mud and sand, or frozen. Thirdly, the connection with the sewer may be stopped up. Now for the remedy. The work of the Street Department ends with opening the street inlet to the basin; the Health Department keeps the basin clean; the Sewer Department looks after the sewer connections; and it may take from one to three hours to get the obstructions removed, and the water running from the street. Now, let us have a cold wave. What is the consequence? Every gutter, every catch-basin is frozen up solid, the streets are a sheet of ice to be picked up and removed. The attempted removal of snow from the crossings is not followed with good results; for, by making the snow at the crossing lower than elsewhere, the crossing, which is laid a little above the street, becomes a depression, and a channel for water only. The duty of removing the snow from crossings, such as can be shovelled or swept, belongs to, or has been assumed by, the Health Department. Such is, in brief, a part of the duty of this department in winter. What is the remedy? The streets can only be kept in good order when covered with snow, by stopping the snow-ploughs of the horse-railroad. Is it advisable to do this? Is it not better to submit to some inconvenience for the sake of the accommodation afforded? At all events, the question

is, simply, shall we allow cars to be run, and salt to be put on the streets, with the inevitable results of sloshy streets; or shall we stop them from running — thereby causing much greater inconvenience to the public — and remove the snow at our own expense?

JOHN W. McDONALD,
Superintendent of Streets.

B. P. L. Bindery
